

BUSINESS SOFTWARE ECOSYSTEM

Your Software. Your Business. Your Ownership.

Build and own the software your business needs instead of paying endless SaaS subscriptions. Powered by **CodeZenX**.

WHO WE ARE

Software built to be **owned**, not rented.

CodeZenX builds business software on our own low-code platform. That means the tools can be shaped to how you actually work, deployed on infrastructure you control, and extended when your business changes - instead of waiting on a vendor's roadmap

Software Ownership

Perpetual licences on our core solutions. Buy once, own it, and stop paying to keep using what you already paid for.

Low-Code Development

Applications assembled visually on the **CodeZenX** platform, with real code exported so you are never locked to one vendor.

Business-Focused Software

Built around your process - pipelines, approvals, fields and reports configured to your business, not a generic template.

Customization & Scalability

Start with what you need now and extend module by module as the business grows.

Powered by the CodeZenX low-code platform

Design data models and screens visually, drop in custom logic where you need it, export clean readable source code, and deploy on-premise or in your own cloud.

Visual schema & UI design · Clean, exportable source code · Deploy where you choose

OUR PRINCIPLES

Customer-first philosophy

We build lasting relationships by putting your success first.

Privacy & security first

Your data, your control always.

Focus on research & development

We keep innovating to solve real business needs.

Long-term commitment

We are here for your growth, today and tomorrow.

THE ECOSYSTEM

Nine ways to own more of your business.

Perpetual solutions you own outright, or subscription products billed monthly.

PERPETUAL - OWN IT OUTRIGHT

CRM

Track leads, deals and every sales conversation in one place, with pipelines and reporting built around how your team sells.

ATS

Publish openings, screen applicants, schedule interviews and move candidates through your own hiring stages.

AI Agents

Task-specific agents that take over drafting, data entry, triage and follow-ups inside the tools your team already uses.

Lead Gen AI

Discover, enrich and score prospects automatically so sales spends its time on conversations, not list building.

Apartment ERP

Residents, units, maintenance requests, dues, facility bookings and notices for a whole community in one system.

Social Media Management

One content calendar across channels, with draft-and-approve steps before anything goes live.

SUBSCRIPTION - BILLED MONTHLY

XE-Accounts

Invoicing, receipts, ledgers, receivables, payables, tax handling and the financial reports your accountant asks for.

CodeZenX

The low-code platform itself - visual design, custom logic, exportable source code and deployment wherever you choose.

HRMS

Employee records, attendance and leave, payroll inputs, onboarding and performance tracking in one place.

SERVICES

Beyond the products

From planning to ongoing support, we help you you get the most from your software with services designed around your business.

Software Consulting

Working out what to build before anyone builds it.

Implementation

Configuration, migration and go-live with your team.

Customization

Fields, workflows and reports shaped to your process

Integration

Connecting the systems you already run.

Automation

"Removing the repetitive work from daily operations.

Support & Enhancement

Ongoing help and new modules as you grow.

Let's talk about what you need.

Tell us how your team works today and we'll come back with a scope and a quote.
